Personalized Solutions

From one R&D bottleneck to a working PoC in four weeks, delivered by senior practitioners.

DURATION	SCOPE	DELIVERED BY
4 weeks	**fixed**	**founders + SMEs**

WEEK 1

Understand

1 day on-site · 8–10 stakeholders

`Deliverable` → Goal-aligned engagement brief

WEEK 2

Analyze

Internal + market/competitor scan

`Deliverable` → Weighted list of bottlenecks, scored

WEEK 3

Plan

Hybrid co-creation w/ your SMEs

`Deliverable` → Costed project briefs, ROI model, prioritized roadmap

WEEK 4

PoC

Hands-on, expanded stakeholder group

`Deliverable` → Working automation / AI tool in your environment

WHAT THE WORK YIELDS

10×
faster cell registration

3×
pre-clinical pipeline growth

~35%
cost reduction

Figures from client engagements such as the Digital Biorepository at a global Swiss pharma and comparable digital-transformation programs.

> "There is a technology for nearly every question in R&D today. The real bottleneck is defining the question with enough clarity to make technology pay off. That is where we start."

METHOD: R&D IN A BOX

Software tools: user-friendly platforms for experiment design.

Automation: robotic systems, precision liquid handlers.

Data integration: consolidating experiments into actionable insight.

Customisation: flexible architecture per assay type.
